FLEXJOBS  
WORDPRESS OPTIMIZATION

---

To Whom This May Concern,

As a highly skilled brand and marketing professional, I read your posting on Flexjobs.com and believe that I am an ideal candidate to complete the project. I have the graphic design skills and Wordpress development skills to complete the project. I am proficient in Adobe Creative Cloud including Illustrator, Photoshop and Dreamweaver which are the programs I would use to complete this project. I would be pleased to further discuss the project via email or via phone so that I may demonstrate how my qualities and abilities may fit your needs. You may also visit my website at [TheDreamPixStudio.com](http://TheDreamPixStudio.com) where you may view my portfolio which includes samples of both web design, graphics and branding.

I run a boutique Design and Branding Studio on the east coast in Massachusetts. My communication and writing skills run even deeper than my technical skills as I began my marketing journey at Boston University where I majored in Public Relations.

My resume does not reveal my contagious enthusiasm, attention-to-detail and reliability which are all qualities needed to be successful in business.

I appreciate you considering my credentials for the Wordpress development project for Artsmith. You may contact me at the telephone numbers above or via email at [lesliedinanno@gmail.com](mailto:lesliedinanno@gmail.com) to further discuss the details of the project.

Sincerely,

Leslie
